

As a Certified Service-Disabled Veteran Organization, we are dedicated to delivering value to our customers while providing products and services that consistently meet expectations and contractual requirements. While our business model is unique, our commitment to quality is not. Our valued relationships with the customer and supplier base are crucial to our mission success and maintaining our reputation as an emerging leader in our industry. We have worked for years to develop this reputation and it is incumbent upon each team member to aggressively follow our processes to ensure that what we deliver is of the highest quality and supportive of those who are flying and operating our Nation's weapons systems.

The Quality Policy of TAG is to deliver the best value products and services that exceed customer expectations. This includes:

- Consistently meeting customer requirements,
- Always providing our customers with the best products and services available,
- Continually improving the management system and the products/service we provide to our customers, and
- Adhering to all relevant and applicable requirements (internal and external), as well as those defined in the International Standard.

Measurable goals and objectives are defined, periodically evaluated and acted upon at defined intervals. These goals help us achieve and improve our overall mission, quality policy, and business strategies.
